

00 - Getting Started - Touchstone Registration / Test System Setup

Track lead: Richard Ettema

During this hands-on session we will begin working with the Touchstone FHIR Testing Platform. To use Touchstone, you will need to register an account, and define and configure your test system in order to execute the various test definitions and examine their results. The following steps are progressive, and each one builds on the previous step, so you will need to perform them in sequence:

1. Register an account and create or join an organization – <http://www.touchstone.com>
2. Define and configure your Test System

1. Register an account and create or join an organization

If you have previously registered an account in Touchstone, please login and continue with step 2.

Please follow the online documentation; Sections 'Registration' and 'Membership':

- <https://touchstone.aegis.net/touchstone/userguide/html/registration/register.html>
- <https://touchstone.aegis.net/touchstone/userguide/html/registration/membership.html>

2. Define and configure your Test System

If you have previously defined a Test System in Touchstone, please move on to the next exercise.

Please follow the online documentation; Section 'Create Test System':

- <https://touchstone.aegis.net/touchstone/userguide/html/test-systems/creating.html>

Please move on to the next exercise - **01 - Touchstone TestScript Execution - Basic Operations.**

Have fun and remember to ask questions if you need help!
